**CV of New Candidate for Director**

New Candidate for  
Director

## Kazunori Kasai

After joining Chubu Electric Power Co., Inc., he gained extensive experience primarily in the fuel division, engaging in a wide range of fuel-related businesses. He subsequently held key positions in the coal trading business at Chubu Energy Trading, Inc. and Chubu Energy Trading Singapore Pte. Ltd.

At JERA, he assumed a role overseeing the entire value chain—from fuel procurement to electricity sales—beginning in April 2015. In April 2019, he was appointed CEO of JERA Global Markets and relocated to Singapore, where he has led coal and LNG trading operations overseas and spearheaded risk management in global business activities.

He has served as Chief Optimization Officer since July 2023, responsible for the optimization of operations, while also serving as Chairman of the Board of JERA Global Markets, which handles fuel and power trading.

It is expected that he will leverage these experiences to further strengthen risk management across the entire value chain and enhance the Company's corporate value.
