

## Overview of the Southern Tsugaru Offshore Wind Power Generation Project

## 1. Overview

|                       |  |
|-----------------------|--|
| Project waters        | Off Tsugaru City and Ajigasawa Town, Aomori Prefecture |
| Generation capacity   | Maximum 600MW  |
| Single machine output | 9.5MW–15MW class                                       |
| No. of generators     | Maximum 63 units (at 9.5MW per unit)                   |
| Area of the project   | Approx. 120km <sup>2</sup>                             |
| Foundation type       | Bottom-fixed (monopile, jacket, or gravity-based)      |
| Construction period   | Approx. 36 months                                      |

## 2. Project location

Note: This map was produced using digital topographic data issued by the Geospatial Information Authority of Japan.
